## UBAM – Global High Yield Solution

Date: December 31, 2022

# SUSTAINABILITY-RELATED DISCLOSURE

## UBAM – GLOBAL HIGH YIELD SOLUTION –

### ARTICLE 8

---

#### Summary

This Sub-Fund is actively managed and invests its net assets primarily in securities denominated in USD. At any time, this Sub-Fund invests a majority of its net assets in bonds and other debt securities. This Sub-Fund will have nominal net exposure of between 80% and 120% to High Yield products via the use of CDS (Credit Default Swaps) within the framework of effective management of the portfolio.

It promotes environmental and social characteristics but does not have as its objective sustainable investment.

The environmental and social characteristics promoted by this Sub-Fund only apply to the sovereign bond allocation of this Sub-Fund. The derivatives instruments, and notably high-yield CDS indices, are out of scope.

In terms of the social characteristics, this Sub-Fund promotes, via investments in sovereign bonds, the sustainability of a country's economic performance given its efficacy meeting the basic needs of its population and reducing poverty, management of social and equity issues and investment in human capital and productivity.

In terms of the environmental characteristics, this Sub-Fund promotes, via investments in sovereign bonds, the sustainability of a country's economic performance given its natural resource endowment, management and supplementation and its risk or resilience to climate change and other natural hazards.

The sustainability indicators used to assess social and environmental characteristics are based on internal environment and social scores built using data from external providers.

The indicator used to measure the attainment of the social characteristics will disclose the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe on the internal social score.

The indicator used to measure the attainment of the environmental characteristics will disclose the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe on the internal environmental score.

The ESG approach covers investments in sovereign bonds. The derivative exposure in this Sub-Fund implemented to gain exposure to the high-yield market falls out of the scope of the ESG strategy.

The ESG approach starts with exclusions, in line with the Investment Manager's Responsible Investment Policy. This is followed by ESG Integration, which aims at assessing sovereign issuers' environmental and social performance

through a proprietary model and qualitative checks. Finally, the Investment Manager prefers Green and Sustainability Bonds, subject to availability, liquidity, and relative value analysis. This Sub-Fund ambitions to increase its allocation to Green Bonds to 10% on a best effort basis should the depth of the market increase over time.

ESG analysis covers at least 80% of the Sub-Fund's allocation to bonds.

This Sub-Fund invests at least 51% in bonds aligned with the environmental and social characteristics promoted by the strategy.

The binding criteria used to attain each of the environmental and/or social characteristics promoted by the Sub-Fund are integrated in control systems, to ensure pre- and post-trade checks. Compliance is monitored by the Risk department on an ongoing basis.

The Investment Manager primarily uses the World Bank as a source of data on sovereign ESG performance.

Depending on the metric considered, some data may be estimated by data providers. Although the Investment Manager applies a thorough selection process of third-party providers, their processes and proprietary ESG methodology may be flawed. As a result, there is a risk of incorrectly assessing an issuer, resulting in an inappropriate capture of ESG risks and potential incorrect inclusion or exclusion in the product. This is expected to have limited impact on the overall environmental and/or social characteristics promoted by the product.

The investment due diligence process ensures that the investment decisions comply with the objectives and the investment strategy of the Sub-Fund. The consideration of sustainability-related risks is integrated into the investment decision-making process to ensure better-informed investment decisions as well as awareness of the risk exposure. The first level of due diligence is conducted by the Investment Manager, while the second level is conducted by the Risk department.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this Sub-Fund.

---

#### No sustainable investment objective

This Sub-Fund promotes environmental or social characteristics but does not have as its objective sustainable investment.

---

## Environmental or social characteristics of the financial product

The environmental and social characteristics promoted by this Sub-Fund only apply to the sovereign bond allocation of this Sub-Fund. The derivatives instruments, and notably high-yield CDS indices, are out of scope as described below. Thus, the environmental and social characteristics promoted encompass the interest rate exposure of this Sub-Fund but not the high-yield credit allocation of this Sub-Fund which is built via CDS indices.

In terms of the social characteristics, this Sub-Fund promotes via investments in sovereign bonds the sustainability of a country's economic performance given its efficacy meeting the basic needs of its population and reducing poverty, management of social and equity issues and investment in human capital and productivity.

In terms of the environmental characteristics, this Sub-Fund promotes via investments in sovereign bonds the sustainability of a country's economic performance given its natural resource endowment, management and supplementation and its risk or resilience to climate change and other natural hazards.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this Sub-Fund.

The sustainability indicators used to assess social and environmental characteristics via investments in sovereign bonds (derivatives are out of scope as described in below) are based on internal environment and social scores built using data from an external provider. The external provider incorporates data relevant to all 17 UN's Sustainable Development Goals.

The indicator used to measure the attainment of the social characteristics will disclose the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe on the internal social score.

The indicator used to measure the attainment of the environmental characteristics will disclose the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe on the internal environmental score.

The considered universe is currently made of more than 100 countries.

---

## Investment strategy

This Sub-Fund is actively managed and invests its net assets primarily in securities denominated in USD. At any time, this Sub-Fund invests a majority of its net assets in bonds and other debt securities. This Sub-Fund will have nominal net exposure of between 80% and 120% to High Yield products via the use of CDS (Credit Default Swaps) within the framework of effective management of the portfolio.

This Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as

REG S or 144A, in respect of the investment strategy of the Sub-Fund.

A minimum of 50% of this Sub-Fund's allocation to sovereign bonds will be invested in issuers deemed to maintain E/S characteristics as measured by MSCI ESG research or equivalent data providers. E/S characteristics are defined as an ESG rating equal or superior to BBB for developed markets issuers and equal or superior to BB for non-developed market issuers. In the absence of a rating from MSCI, an internal rating may be assigned by the Investment Manager. The derivative exposure in this Sub-Fund implemented to gain exposure to the high-yield market falls out of the scope of those requirements.

The ESG investment strategy is based on three pillars that are bidding elements in the investment strategy with regards to the promotion of E/S characteristics. The below only apply to sovereign bonds. The derivative exposure in this Sub-Fund implemented to gain exposure to the high-yield market falls out of the scope of the ESG strategy.

- Exclusions applicable to this Sub-Fund, according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>). In addition, in line with UBP's Group policy, securities under EU, HK, OFAC, Swiss, UK and UN sanctions are also excluded from this Sub-Fund, as well as investments in FATF "high-risk countries", while any investment in FATF "jurisdictions under increased monitoring" are subject to due diligence and approval.

- ESG integration.

ESG integration is implemented on sovereign issuers through a two-step process:

- External data sources provide information to an internal model to build a quantitative scoring system for each sovereign issuer.

- A qualitative check follows this, where adjustments to the score are possible.

Sovereign issuers deemed to have severe ESG deficiencies, based on this approach, are excluded from the investment universe. ESG and financial views are combined to select the issuers. At least 80% of the Sub-Fund allocation to bonds is covered by the extra-financial analysis.

- Preference for green bonds and sustainability bonds with environmental objectives ("Green Bonds"). The preference for Green Bonds should be considered as an objective and is conditional to availability, liquidity conditions and relative value analysis. The investment universe for Green Bonds as targeted by this Sub-Fund is currently limited. This Sub-Fund ambitions to increase its allocation to Green Bonds to 10% on a best effort basis should the depth of the market increase over time.

---

## Proportion of investments

The planned asset allocation of this Sub-Fund will be a 51% minimum of bonds aligned with E/S characteristics.

Other investments will be cash, cash equivalents and derivatives for liquidity management and efficient portfolio management. Derivatives will be implemented in this Sub-Fund to gain access to the high-yield market. Those instruments do not participate in attaining the environmental or social characteristics promoted by this Sub-Fund.

Other Investments included can also include bonds. In that case, the bond investments include minimum safeguards to the extent that they have to respect the exclusion rules applicable to the Sub-Fund.

---

### Monitoring of environmental or social characteristics

The selection criteria used to attain each of the environmental and/or social characteristics promoted by the financial product have been implemented in our control systems. The Risk department (second level of control, fully independent) is in charge of the controls and of the coding of the defined elements within our control systems.

Blocking pre-alerts are automatically generated if a trade is initiated for an asset that is not authorised due to the binding elements of the financial product (e.g. exclusion rules).

Post-trade alerts are generated for excesses, and portfolio managers are notified the day after the breach.

In case of excess, rules are in place to ensure a return to compliance at the earliest possible moment and in the best interest of shareholders.

---

### Methodologies

#### Sovereign Social Score

The Investment Manager has developed a proprietary model to assess a sovereign issuer' social performance. The Sovereign Social Score is calculated using over 20 World Bank indicators grouped in 6 themes

- Education & skills
- Employment
- Demography
- Poverty & Inequality
- Health & Nutrition
- Access to Services

#### Sovereign Environmental Score

The Investment Manager has developed a proprietary model to assess a sovereign issuer' environmental performance. The Sovereign Environmental Score is calculated using over 20 World Bank indicators grouped in 5 themes

- Emissions & pollution
- Natural capital endowment and management
- Energy use & security

- Environment/climate risk & resilience
- Food Security...

---

### Data sources and processing

- (a) the data sources used to attain each of the environmental or social characteristics promoted by the financial product

The Investment Manager bases its Sovereign ESG analysis on the World Bank Sovereign ESG Data portal (BETA) (<https://datatopics.worldbank.org/esg/>). In total, the portal covers over 70 ESG indicators with 40 additional indicators over 61 years and across 217 economies.

- (b) The measures taken to ensure data quality

The Investment Manager reviews regularly the service provided by third-party ESG data providers and engages with them when needed to address potential issues, get a better understanding of the methodologies used or to increase data coverage. This is under the joint responsibility of the Responsible Investment team and the Market data team.

Data providers are requested to provide audited reviews of their processes on an annual basis.

- c) how data are processed

The Investment Manager relies on the information they collect from the issuers they analyse (including due diligence reports, management meetings, annual and sustainability reports), as well as from brokers and rating agencies supplemented by external ESG service providers.

Where possible, data feeds are required from data providers and are automatically integrated within our portfolio management system. Where necessary, additional ad-hoc data may also be used.

- d) the proportion of data that are estimated

Since the extent of corporate disclosure might vary by region and currently still lacks content and completion, the Investment Manager relies among other things on data from external third-party providers which may be estimated.

The level of estimation per indicator varies significantly depending on the extent of direct disclosure by issuers.

The proportion of estimated data is expected to decrease over time as greater data disclosure regulations come into force.

---

### Limitations to methodologies and data

Although the Investment Manager applies a thorough selection process of third-party providers, their processes and proprietary ESG methodology may be flawed. As a result, there is a risk of incorrectly assessing an issuer, resulting in an inappropriate capture of ESG risks and potential incorrect inclusion or exclusion in the product.

This is expected to have limited impact on the overall environmental and/or social characteristics promoted by the product.

---

### **Due diligence**

The investment due diligence process ensures that the investment decisions comply with the objectives and the investment strategy of the Sub-Fund. The consideration of sustainability-related risks is integrated into the investment decision-making process to ensure better-informed investment decisions as well as awareness of the risk exposure.

The exclusion policy acts as a first screening in the due diligence process and for funds with sustainable investment objectives, the indicators of the principles of adverse impact are used to ensure that the sustainable investments "do not significantly harm" any environmental or social objectives.

The first level of due diligence is conducted by the Investment Manager. The second level of due diligence is conducted by the Risk department, which ensures on-going monitoring.

---

### **Engagement policies**

The Investment Manager does not currently engage with Sovereign Issuers

---

### **Designated reference benchmark**

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this Sub-Fund.

Pursuant to Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability - related disclosures in the financial services sector (the "Disclosures Regulation" or "SFDR"), funds are required to make certain disclosures. Funds falling under the scope of Article 6 of the SFDR are those which have been deemed not to pursue an investment approach that explicitly promotes environmental or social characteristics or has sustainable investment as their objective. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities. Notwithstanding this classification, the Investment Managers may take account of certain sustainability risks as further described in the fund's prospectus. Funds falling under the scope of Articles 8 or 9 of the SFDR are those subject to sustainability risks within the meaning of the SFDR. The sustainability risks and principal adverse impacts as stipulated in the SFDR are described in the prospectus. In addition, unless otherwise specified, all funds apply the UBP Responsible Investment policy, which is available on <https://www.ubp.com/en/investment-expertise/responsible-investment>

UBP relies on information and data collected from ESG third party data providers which may prove to be incorrect or incomplete. Although UBP applies a proven selection process of such third-party providers, its processes and proprietary ESG methodology may not necessarily capture appropriately the ESG risks. Indeed, data related to sustainability risks or PAI are today either not available or not yet systematically and fully disclosed by issuers, may be incomplete and may follow various methodologies. Most of the ESG factors information is based on historical data that they may not reflect the future ESG performance or risks of the investments.

ESG information providers: Although Union Bancaire Privée, UBP SA, ESG information providers (the "ESG Parties") obtain information from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy and/or completeness of any data herein. None of the ESG Parties makes any express or implied warranties of any kind, and the ESG Parties hereby expressly disclaim all warranties of merchantability and fitness for a particular purpose, with respect to any data herein. None of the ESG Parties shall have any liability for any errors or omissions in connection with any data herein. Further, without limiting any of the foregoing, in no event shall any of the ESG Parties have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

Any subscriptions not based on the funds' latest prospectuses, KIIDs, annual or semi-annual reports or other relevant legal documents (the "Funds' Legal Documents") shall not be acceptable. The Funds' Legal Documents may be obtained free of charge from Union Bancaire Privée, UBP SA, 96-98 rue du Rhône, P.O. Box 1320, 1211 Geneva 1, Switzerland (UBP), from UBP Asset Management (Europe) S.A., 287-289 route d'Arlon, 1150 Luxembourg, Grand Duchy of Luxembourg, and from Union Bancaire Gestion Institutionnelle (France) SAS, 116 avenue des Champs-Élysées, 75008 Paris, France. The English version of the prospectus of the Fund as well as a summary of investor rights associated with an investment in the Fund are available on [www.ubp.com](http://www.ubp.com). The fund's management company may decide to terminate or cause to terminate the arrangements made for the marketing of its collective investment undertakings in accordance with Article 93a of Directive 2009/65/EC. The Swiss representative and paying agent of the foreign funds mentioned herein is UBP. The Funds' Legal Documents may be obtained free of charge from UBP, as indicated above.
